

## Report on Data Science related Meet Up

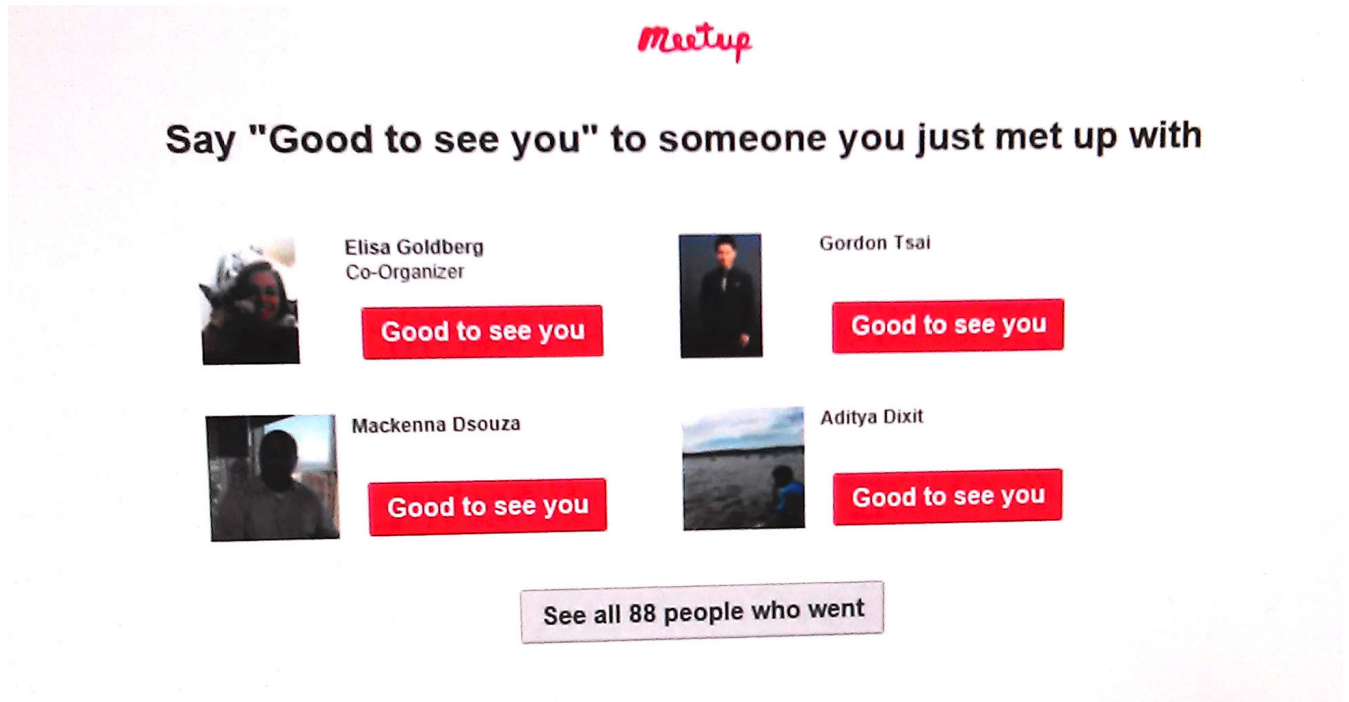

Austin Python Meet Up

Event: Introduction Machine learning with Python

Date: November 15th, 2017

Location: Galvanize

Meet Up

### Presenter

Elisa Goldberg has been an Evangelist at Galvanize Inc for 10 years. She has extensive experience in the Data Science/ Artificial Intelligence space through years working at and with Fortune 500s and entrepreneurs alike.

### Description

Machine Learning is at the intersection of computer science and statistics. The growth of the open data movement along with increased computing power has really fueled the growth in various areas of machine learning. It's a must-have skill for all aspiring data analysts and data scientists, or anyone else who wants to wrestle all that raw data into refined trends and predictions.

The follow topics were discussed:

- Development set up using Anaconda
- Version control with Github and Mercurial
- Supervised learning and unsupervised learning with Scikit-Learn.

Pros

Meeting other Python users

Make contacts to expand my network.

Cons

Disorganized presentation

Little new material
